

RYE WHISKY

Whisky
60,3%

Description:

This special Rye Whisky is manufactured only from pure caramelized rye malt. An additionally taste of cacao and coffee is added to the typical rye palate of the malt due to the powerful roasting process.

After carefully distilling the mash, a certain amount of pure Styrian water is added to maintain the optimal alcoholic strength for maturing in a cask, which shows up to be around 60 percent by volume alcohol. Subsequently the raw rye whisky is matured for around 4 years in a new wood cask with a capacity of 225 liters, made of American oak with a heavy toasting (this kind of oak was chosen because it gives the whisky a manifold and unique flavor).

To allow the rye whisky presenting its tremendous powerful taste, we decided to bottle it with its full cask strength of 60,3 percent by volume alcohol.

Nose:

dark bread crust, malt, very delicate wood aromas

Palate:

dark bread, malt, cocoa bean, long-lasting warming finish
